

SAXON PALLE

ServiceNow Admin/Developer

saxonpalle15@gmail.com

+1-603-588-5571

www.linkedin.com/in/saxon-palle

PROFESSIONAL SUMMARY:

- **Certified ServiceNow Administrator & Developer with 9+ years of experience** delivering scalable enterprise solutions across **ITSM, workflow automation, and platform customization** in large-scale environments including The World Bank Group
- **Strong expertise in ServiceNow ITSM modules** including Incident, Problem, Change, Request, Service Catalog, Knowledge Management, CMDB, and Service Portal
- **Proven experience in end-to-end ServiceNow implementation**, including requirement gathering, solution design, development, UAT, deployment, and production support
- **Hands-on expertise in scripting and development** using Client Scripts, Business Rules, Script Includes, UI Policies, Flow Designer, Glide API, and JavaScript
- **Extensive experience in workflow automation**, improving operational efficiency and reducing manual effort across enterprise processes
- **Strong ServiceNow platform administration skills**, including users, roles, groups, and Access Control Lists (ACLs) ensuring secure and compliant access
- **Expertise in reporting and analytics**, including custom dashboards, SLA metrics, reports, and data roll-ups for business insights
- **Experience with CMDB governance**, including CI relationships, data integrity, and enterprise asset management best practices
- **Hands-on experience in integrations**, working with REST/SOAP APIs, web services, and data transformation techniques
- **Strong background in UI/UX and frontend development**, leveraging HTML, CSS, JavaScript, and Figma to build intuitive Service Portal and enhanced user experiences
- **Working knowledge of modern technologies**, including AI-assisted development, automation tools, Power BI integration, and Azure Functions (*actively expanding in AI-driven solutions*)
- **Leveraged ServiceNow Now Assist to automate content creation**, including incident resolution notes and knowledge suggestions
- **Integrated Now Assist capabilities into ITSM processes to improve agent efficiency and reduce manual effort**
- **Proven ability in troubleshooting and performance optimization in high-availability enterprise environments**
- **Strong collaboration with cross-functional teams**, including business stakeholders, IAM, and technical teams to deliver secure, scalable, and user-centric solutions
- **Experience in mentoring and guiding teams**, contributing to best practices, code quality, and platform governance

TECHNICAL SKILLS:

ServiceNow	ITSM, CMDB, ITAM, GRC, Service Catalog, Flow Designer, Workflows, Client Scripts, Business Rules, Script Includes, UI Policies, ACLs, Service Portal
Programing:	JavaScript (ServiceNow Scripting), HTML5, CSS3

Scripting Languages:	JavaScript, HTML, CSS, AJAX, XML, JSON, JQuery.
Databases:	GlideRecord, ServiceNow Tables, SQL (Joins, Queries), MySQL, Oracle
Integrations:	REST APIs, Web Services
IAM:	Microsoft Entra ID (Azure AD), Role-Based Access
Tools:	Azure DevOps, TFS, SharePoint, MS Office, Visio, HP ALM, Trello
Methodologies:	Agile (Scrum), Waterfall, SDLC

PROFESSIONAL EXPERIENCE:

- **Configured and supported core ITSM modules** (Incident, Problem, Change, Request, Service Catalog, Knowledge, CMDB) across The World Bank Group
- **Improved incident routing and SLA performance**, optimizing assignment rules and reducing resolution delays
- **Developed and automated solutions** using **Client Scripts, Business Rules, Script Includes, UI Policies, and Flow Designer**
- **Designed and enhanced Service Catalog workflows** with dynamic forms and approval processes to streamline request handling
- **Built dashboards and reports** for **SLA tracking, KPIs, and operational insights**
- **Maintained CMDB data quality and governance**, ensuring accurate CI relationships
- **Resolved production issues and performed root cause analysis**, improving platform stability and performance
- **Supported UAT and production deployments**, ensuring smooth releases
- **Implemented integrations** using **REST/SOAP APIs** for external system connectivity
- **Enhanced Service Portal and UI/UX** using **HTML, CSS, JavaScript, and Figma inputs**
- **Leveraged AI-assisted tools** to improve development efficiency (*actively expanding AI skills*)
- **Collaborated with cross-functional teams and mentored junior developers**

The World Bank Group
ServiceNow Admin/Developer
Sep 2017 – Present

Description:

Worked as a **ServiceNow Administrator & Developer** delivering enterprise solutions across **Climate Investment Fund (CIF), Global Partnership for Education (GPE), and Adaptation Fund**, supporting **financial workflows, reporting, and operational efficiency**. Transitioned from **UX/UI background** to a **full-stack ServiceNow role**, combining **frontend and platform expertise**.

Roles & Responsibilities:

- Gathered and translated **business requirements** into scalable **ServiceNow solutions** for **IAM and enterprise workflows**
- Designed and implemented **end-to-end workflows** for **user lifecycle management, access requests, and approvals**
- Configured and customized **ITSM modules (Incident, Problem, Change, Service Catalog, Knowledge)**
- Developed automation using **Client Scripts, Business Rules, Script Includes, UI Policies, Flow Designer, Glide API**

- Administered platform security using **Users, Roles, Groups, and ACLs** ensuring **secure and compliant access**
- Integrated ServiceNow with **Microsoft Entra ID (Azure AD)**, **Active Directory**, and external systems using **REST/SOAP APIs**
- Built backend logic and data handling using **GlideRecord** and optimized performance
- Created **dashboards and reports** for **SLA tracking, compliance, and operational insights**
- Enhanced user experience using **UX principles**, improving **forms, layouts, and usability**
- Designed **wireframes and UI mockups in Figma** for **Service Portal and form enhancements**
- Customized **Service Portal/UI** using **HTML, CSS, JavaScript** for improved user engagement
- Leveraged **Angular and frontend expertise** for **UI enhancements and data visualization**
- Led **UAT cycles**, validated functionality, and incorporated stakeholder feedback
- Supported **release management and deployments** across **Dev, QA, and Production**
- Maintained **technical documentation** including workflows, configurations, and user guides
- Collaborated with **IAM, security, backend, UX, and business teams** to deliver scalable solutions
- Identified automation opportunities and improved workflows to enhance efficiency
- Monitored and resolved **performance issues and workflow bottlenecks**
- Developed **reusable components and UI standards** to accelerate development

KEY ACHIEVEMENTS

- Reduced manual effort by **30–40%** through automation of **IAM workflows using ServiceNow**
- Improved **SLA compliance and incident resolution time** via workflow and assignment optimization
- Successfully integrated ServiceNow with **Azure AD**, enabling **automated user provisioning**
- Enhanced **Service Portal UI/UX**, increasing **user adoption and satisfaction**
- Strengthened platform security using **ACLs and role-based access controls**
- Improved **CMDB data accuracy and governance** through audits and validation

Environment: ServiceNow (ITSM, ITOM, HRSD, CSM, GRC, SecOps, CMDB), Service Portal, Glide API, JavaScript, HTML5, CSS3, Angular, REST/SOAP APIs, Microsoft Entra ID (Azure AD), Active Directory, AWS (S3, Lambda, API Gateway, CloudWatch), Jenkins, GitHub, Kubernetes, Figma, AI/ML (working knowledge)

Deluxe

ServiceNow Administrator / Developer
Aug 2016 – Sep 2017

Roles & Responsibilities:

- Served as **ServiceNow Administrator & Developer** supporting **global security and corporate IT operations**
- Administered core modules including **Incident, Problem, Change, Request, Service Catalog, Knowledge, and CMDB**
- Developed custom logic using **Business Rules, Client Scripts, Script Includes, UI Policies, UI Actions, and Catalog Client Scripts** with **JavaScript and Glide API**
- Designed and enhanced **Service Catalog items and Record Producers**, including **complex variable sets, reference qualifiers, and multi-level approval workflows**

- Built **end-to-end workflows and Flow Designer automations** for **onboarding/offboarding, access provisioning, incident escalation, SLA breaches, and change approvals**
- Customized **Service Portal pages, widgets, and themes**, improving **self-service adoption and reducing service desk workload**
- Implemented **server-side scripting** for **data validation, automation, and backend processing**
- Developed and supported **REST integrations, inbound/outbound web services, and data imports using Import Sets and Transform Maps**
- Created **custom tables and scoped applications** to support business-specific requirements
- Led **CMDB governance**, including **CI class design, relationship mapping, normalization, reconciliation rules, and CMDB health dashboards**
- Worked on **Discovery remediation, transform scripts, and scheduled jobs** to improve **data quality and eliminate duplicate/stale records**
- Supported **Hardware Asset Management (HAM)** including **asset-CI mapping, lifecycle tracking, and state synchronization**
- Managed **users, roles, groups, and ACLs**, ensuring **secure role-based access control**
- Supported **platform upgrades and patching**, including **update sets, regression testing, and post-upgrade fixes**
- Built **reports, dashboards, and SLA metrics** for **performance tracking and compliance**
- Performed **advanced troubleshooting and root cause analysis** for scripts, workflows, integrations, and performance issues
- Collaborated with **infrastructure, application, and business teams** to deliver scalable solutions

Environment: ServiceNow (Custom Applications, ITSM), Data Sources, Transform Maps, SOAP/REST Web Services, Glide Scripting, Groups & ACLs, Notifications, Email Templates (HTML), Update Sets, Agile/SCRUM.

General Electronics

UX/UI Developer

Mar 2016 - July 2016

Roles & Responsibilities:

- Developed responsive web applications using HTML5, CSS3, JavaScript, and AngularJS
- Created wireframes, mockups, and prototypes using Figma, Adobe Photoshop, and InVision
- Translated UX designs into scalable, user-friendly UI components
- Built single-page applications (SPA) using AngularJS and integrated APIs using http services
- Implemented form validations, directives, and dynamic UI features in AngularJS
- Developed responsive layouts using Bootstrap and Media Queries for cross-device compatibility
- Ensured cross-browser compatibility across Chrome, Firefox, Safari, and Internet Explorer
- Applied JavaScript and jQuery for UI enhancements, animations, and custom components
- Collaborated with cross-functional teams in an Agile/Scrum environment
- Participated in usability testing, improving UI/UX based on feedback
- Created sitemaps, user flows, and screen designs to support information architecture
- Maintained code quality by writing unit test cases (Jasmine) and ensuring high coverage
- Optimized UI performance and application responsiveness
- Worked with stakeholders to gather requirements and deliver scalable frontend solutions

Environment: JavaScript, HTML5, CSS3, Bootstrap, jQuery, Figma, Adobe Photoshop, InVision, Sketch

Billboards India Advertising

UX Designer

Sep 2013 – Aug 2014

Roles & Responsibilities:

- Assisted in designing user-centric layouts and visual concepts for digital advertising campaigns and web platforms
- Created wireframes, mockups, and prototypes for landing pages and promotional content
- Conducted user research and basic usability analysis to understand audience behavior and improve engagement
- Collaborated with marketing and design teams to align UX designs with branding and campaign objectives
- Designed intuitive UI elements and layouts to enhance user interaction with digital advertisements
- Supported development of user journeys and content flow for campaign-based web experiences
- Worked with tools like Figma and Adobe Photoshop to create and refine design assets
- Participated in design reviews and feedback sessions, incorporating changes based on stakeholder input
- Ensured design consistency and visual standards across multiple campaigns and platforms
- Assisted developers in implementing designs, ensuring accuracy and usability

Environment: Adobe Photoshop, Adobe Illustrator, Sketch, Balsamiq, HTML5, CSS3, Microsoft PowerPoint, MS Visio.

EUDCATION:

Southern New Hampshire University
Masters in information technology

2014-08 - 2016-01

CERTIFICATIONS:

- **ServiceNow Certified System Administrator (CSA)**
- **ServiceNow Certified Application Developer (CAD)**
- **Salesforce Certified Platform Developer I**
